Strengthening technological transfer offices in Albanian Universities

TTO4FOOD

Second round of Living LAB and Exchange lab

UNIBA and CIHEAM

from 6 to 10 September 2021.

The objective of this second meeting is to build a second step for the design of TTOs in the 4 Albanian universities. After having collected and clustered the problems and needs of the 4 universities (july 2021), in this phase will be shared the first solutions: what possible tools and services can be developed in the future TTO- Albanian University. To this end, it will also contribute exchange lab activities, activities and experiences told by the heads of the TTO- University of Bari, as well as some cases of spin-offs and university-business collaboration (technical visits). Analysis of the results of the "Second round of Living LAB" will represent inputs for the third and last step (Living lab Albania, October 2021) which will complete the design of the TTOs and will contribute to the drafting of the guidelines for the creation of the 4 TTOs in Albanian universities and to the strengthening of the "third mission" (Bologna process): "the set of activities that let the universities enter into direct interaction with society". The development of the guidelines will be carried out by a specific working group made up of experts nominated by each partner

10.30 LIVING LAB TABLES:

Three co-design LL tables will be created, each one with a specific topic detailed here below, aiming at opening a dialogue among the Albanian participants and the experts in order to find potential solutions for the issues highlighted during the last living lab in Albania.

Methodology: 20 minutes at the co-design table with facilitators and experts, while the participants from the 4 Albanian universities will rotate on the three tables.

The facilitator presents a poster reporting the results of the first living lab round done in Albania with clustered problems relative to the specific topic of the table. A second blank poster will be used to write the solutions proposed by the participants at the table. At the end, the facilitators will present the summary of the three tables on the potential solution for Albanian TTO

Table 1 Cooperation University-companies (facilitator: A. **Demarinis** , F. Notarangelo; expert: Pirlo, De Angelis; Participant: at least one person per Albanian university)
